

Construction Vessels of the World - 10th Edition

Here it is, the new tenth edition of the World's only register listing every class of vessel working on field development, construction and pipe and cable laying projects throughout the world.

In all, this unique book reviews in detail almost 1,700 vessels and extends to 908 pages to provide, quite simply, the finest reference available for anyone involved or interested in the marine side of offshore operations.

For this new edition we have added numerous newbuilds and conversions and at the same time re-checked every item of data and updated this as necessary for all existing vessel entries.

You'll be able to see from the typical pages illustrated, just how comprehensive this data is, giving you every shred of ownership, performance, specification and capacity detail you'll need and more.

We have included an eight page full colour montage of typical vessels from the various fleets contained within this register.

This data can also be supplied as a database or online subscription. See the order form overleaf for price details.
