

# The Dredger Register 2017

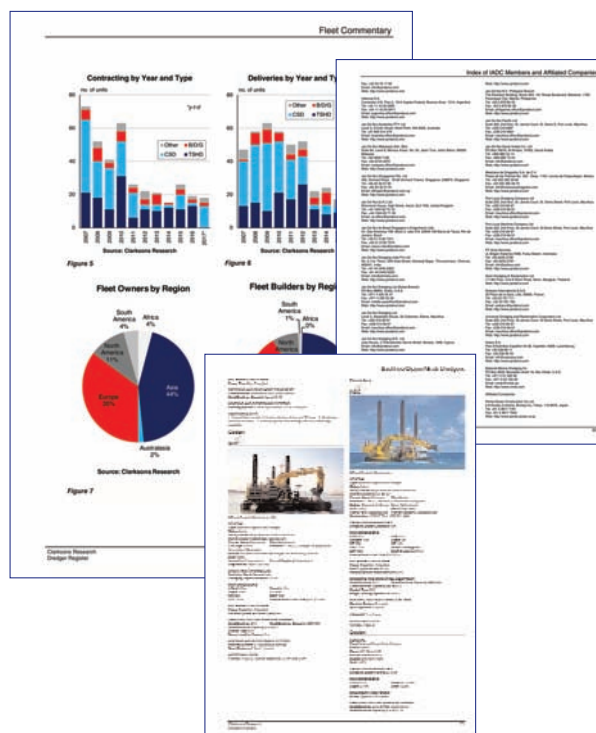

First published in 1997 and now in its fourteenth edition, this unique and industry standard register is produced on an annual basis to offer our customers the most up-to-date information. With the on-going assistance of the IADC and many of the world's best known dredging contractors we have been able to compile an even more comprehensive register.

Available on  
World Fleet  
Register

The information in the Dredger Register is derived from Clarksons Research's unique and comprehensive fleet database covering over 150,000 vessels. The Dredger Register documents more than 1,600 vessels in the fleet and on order. In addition to detailed technical information on every single unit, the register also features information on every builder, owner, class society and flag state involved in the industry.

More information on Dredgers along with underlying data is available as a separate module on World Fleet Register.

**We will offer a 25% discount to members of the IADC, CEDA, IAPH or the Institute of Civil Engineers.**
