

Mobile Production Systems of the World - 8th Edition

It's here, the latest edition of the world's definitive register of Mobile Production Systems. This new 8th edition has been fully researched and updated and it's better than ever.

Over the years the floating mobile option for production of deepwater, remote or smaller fields has become more and more popular.

This important reference book has chronicled this trend since the first edition was published 16 years ago. In all, this edition provides fully updated specification, performance and field application data for 215 FPSOs including the new cylindrical designs (new build and conversions), 46 Jack-up conversions, 51 semi-sub conversions, 16 Spars, and 31 TLPs including mini TLP designs, working on over 180 fields world-wide.

All this information is brought to life by hundreds of photographs and general arrangement drawings to make the contents highly readable.

This data can also be supplied as a database or online subscription. See the order form overleaf for price details.
