

Offshore Drilling Rig Monthly

Offshore Drilling Rig Monthly is a unique and comprehensive analysis of the drilling rig market produced each month from the world's leading Offshore and Energy database. Fifty two pages of monthly analysis of demand, supply and utilisation across all Jack-Up and Floater sectors are provided in consistent and "easy to use" style. Latest day rates, contracts, contract extensions, regional deployment, asset values, newbuilding prices and IPO & Bond activity provide up to date commercial data while detailed fleet, orderbook, age profile, cold stacking and demolition analysis make this report the authoritative guide to rig market supply.

Over 1,000
Drilling
Rigs

Rankings of builders, builder countries, drilling contractors, operators, designs, engine builders, drilling equipment and operator activity provide market share and competitor analysis while forecasts of demand, supply and utilisation are provided and monitored each month making this the "must have" intelligence from Clarkson's Research. In addition to the main report a supplement detailing every drilling contractor and listing their rigs by deployment, contract status and operator relationships is published along with the orderbook listing.

This market report is essential reading for all drilling contractors, oil companies, yards, banks, oil service companies, equipment suppliers, class societies and flag states.

This market report can be viewed online along with the underlying data on Offshore Intelligence Network.
