

Oil & Tanker Trades Outlook

Oil & Tanker Trades Outlook covers two inextricably linked markets in a comprehensive manner which gives shipping industry participants the opportunity to see the oil markets from their point of view and understand how they impact upon their business.

Providing full coverage of every major tanker sector, Oil & Tanker Trades Outlook contains "at a glance" reviews of the VLCC, Suezmax, Aframax, Panamax and Products Tanker markets, which include the latest data on freight rates, vessel earnings, market activity, sale and purchase, fleet development and the supply-demand balance.

The oil markets are covered in a manner appropriate to all shipping industry players. Up to date data is provided on seaborne trade flows of crude oil and oil products, global oil supply, and regional oil refinery capacity and inventories. Latest trading information includes data on oil prices, spreads and arbitrage opportunities, whilst tanker safety and incidents are also covered.

In addition, an 8-page supplement analyses the tanker fleet and orderbook across 19 size groups, including a detailed breakdown of scheduled single-hull tanker phase out.
