

NEW

# Offshore Vessel Registers 2011

The market's new definitive annual offshore register series.

Introducing the NEW 2011 Offshore Vessel Register Series from Clarkson Research. This unique and definitive series is being launched on an annual basis to offer our customers the most up-to-date information in hard copy and digital format.

Each one of the registers will coincide with the market relevant segmentation in our new *Offshore Intelligence Monthly* and will also be available in PDF, e-reader format and web delivery so customers will have access to the information they need where and when they need it.

Derived from the world's most powerful offshore database, this industry standard series will document Clarkson's unique comprehensive global coverage of 10,995 mobile structures supporting the offshore industry through field development, production and support. The series will also document the 1,101 vessels and structures on order in addition to every builder, fabricator, owner, class society and flag state involved in the industry.

The new series will include the traditional technical review of each vessel or structure and in addition will also include focused analysis, market overview, commentary and 50 statistical tables.
