

# Shipping Intelligence Network (SIN)

Re-launched in 2010 with new lively plus faster more efficient navigation, but the same unrivalled access to information about the shipping industry whose range and depth is unsurpassed.

Whatever your role in the shipping industry you will find a wealth of information to support your business, whether you are an owner, a shipper, a trader, a charterer, a builder, a breaker, an equipment manufacturer, any other ship supplier, a banker, a financier, an insurer, a lawyer, a regulator or in the media.

There is information for everyone. Shipping Intelligence Network contains the full range of information collected by Clarkson Research including downloadable versions of its periodicals, extensive lists and analyses of the fleet and orderbook and thousands of time series and graphs of key maritime information. What we have done is applied common sense and new technology to the old science of information flow, and made SIN a fast and efficient tool for the whole of the maritime industry.

The 2010 re-launch makes navigating the extensive databases in SIN easier than ever. Fast access to important parts of the site and allow you to get exactly the information you want with just a couple of clicks. In particular, finding those time series that are so essential for analysing the shipping markets is made far simpler.

To discover the power and the range of data available on Shipping Intelligence Network, go to [www.clarksons.net](http://www.clarksons.net) and follow the instructions. Getting the information you want has never been easier.

# What you can expect from Shipping Intelligence Network...

## Shipping Markets

- Markets: reports on 20+ market sectors, including –tankers, bulkers, containers, gas, chemical, short sea, newbuilding, sale and purchase, demolition, bunkers – updated daily with graphs.
- Features: latest articles from Clarkson Research publications.
- Fleet news: alerts to changes in the fleet – deliveries, contracts, demolition, losses
- Register: brief details of our fleet database.

## Fleet, Shipbuilding and Charter Markets

Our Register data (as at January 2010) comprises over 43,000 existing vessels and 8,000 ships on order. With SIN you have a powerful tool that allows you to access and cross reference a vast wealth of information about them.

- Starting with listings of the fleet or the orderbook organised into 11 main ship types and 95 sub-categories you can then link to:
  - individual ships data
  - owner data
  - shipbuilder data
- Ships data: view full information available about individual ships including a sales and fixture history (for tankers and bulkers). In addition there is a peer group analysis which pinpoints the number and characteristics (dimensions, flag, class, ownership, builder) of similar ships by type, size and age. Useful data on competitors.

- Owner data: full lists of vessels (by type) currently owned and on order by individual owners, including key data about each ship. Data can also be accessed directly via an owners' search button.
- Shipbuilder data: full lists of vessels currently on order with the builder, previously built ships in service and no longer in service, with key data about each vessel. Data can also be accessed via a builders' search button.
- Listings of ship second hand or demolition sales, contracting of new orders or newbuilding deliveries are similarly cross referenced.
- Flag data for ship types/categories or ships registered under a particular flag is also available through the fleet search button
- Fixtures: all reported spot and period fixtures for tankers and bulk carriers are available and can be accessed by month or year for each ship type or listed for each individual ship. They are also available by owner, charterer and load or discharge area.
- Ship sales: like fixtures, ship sales are available by month or year or for each ship type over time.
- Fleet developments and changes (deliveries, scrapping etc.) for all ship types/categories measured in numbers of ships and dwt
- Shipbuilding data: orderbook, contracting and deliveries by ship type/category and by country/region of build in various units
- Commercial data: spot freight rates and earnings, period rates, newbuilding second hand and demolition prices; all by ship type/category; choose your own frequency. Volume of activity in each of these market areas – fixtures, sales etc. - is also available
- Economic and financial data: commodity prices (oil, bunkers, steel etc), trade (oil, ore, coal, grain, containers etc), production (oil, steel), GDP, industrial production, exchange rates, interest rates.

## Publications

As soon as they are ready Clarkson Research publications are posted to Shipping Intelligence Network. It includes:

- Shipping Intelligence Weekly
- World Shipyard Monitor
- Dry Bulk Trade Outlook
- Oil & Tankers Trades Outlook
- Container Intelligence Monthly
- Shipping Review & Outlook

Hot from the press in downloadable formats you can take the whole publication, just one or a few pages. An alert can signal when a new periodical is posted and there is also an archive for you to browse. This alone makes Shipping Intelligence Network one of the best buys available in the shipping market.
