

World Offshore Register

World Offshore Register (WOR), the ultimate database for participants in the offshore and energy markets.

25.5m bpd
Offshore Oil
Production

World Offshore Register is the comprehensive offshore register from Clarksons Research, allowing powerful “drill” down into Clarksons’ unique Offshore and Energy database.

- 1 Comprehensive data covering all offshore field infrastructure and the fleet of vessels and rigs that support all stages of exploration, development and production.
- 2 Insightful analysis including key reports, time-series and mapping.
- 3 Time-series of rates, prices, utilisation and production.
- 4 Detailed information on adjacent markets including Renewables and Decommissioning.
