

World Shipyard Monitor

World Shipyard Monitor is the monthly shipbuilding report the shipyards use. It's also essential for shipping investors, equipment manufacturers and forecasters who need the facts about ship supply.

World Shipyard Monitor is designed to provide a clear 'at a glance' insight into the supply side of the shipping industry. The orderbook, contracting and deliveries at over 600 shipyards are updated monthly along with analysis of shipyard capacity. Well laid-out tables, graphs and listings show the reader who is building the ships, and what the level of newbuilding investment is, as well as the details on individual contracts.

- Orderbook, Contracting, Deliveries and Demolitions:** Orderbook, contracting and deliveries data are reported in number, DWT, GT and CGT across the full range of ship types. The number, DWT, GT and average age of vessel demolition sales are also updated every month. The orderbook across 37 ship types is listed separately by delivery date and shipyard.
- Investment and Regional Analysis:** The value of newbuilding investment is analysed by ship type and by owner region, whilst contracting, deliveries and the orderbook are also presented on a country and regional basis
- Fleet Forecasts:** Monthly updates of fleet development by ship type sector are presented along with fleet forecasts for the next two years.
