

World Fleet Register

The leading online vessel register service from Clarksons Research – powerful, comprehensive and easy to use.

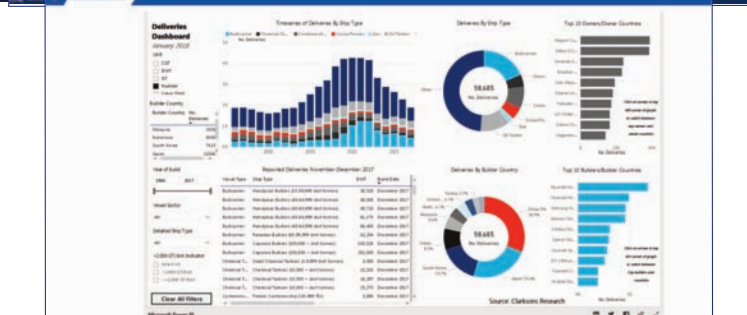

Building on more than 50 years of vessel data heritage, the World Fleet Register is the market leading online vessel reference tool from Clarksons Research, the largest commercially led research unit in the maritime world.

Providing details for up to 150,000 ships above 100gt, the World Fleet Register provides comprehensive, authoritative and timely information in a powerful and user friendly format to clients across the shipping industry.

With “drill down” detail on vessel specification, machinery, flag, class, incidents, and owner and builder details, in addition to the “big picture” context through reports, rankings, time series, graphs and profiles, and new interactive dashboards and intelligence sections on environmental regulation, ship technology and market developments, the World Fleet Register is the ultimate tool for those needing information for operations or intelligence for marketing or strategy.

Clarksons Research is respected worldwide as the most authoritative provider of intelligence to the global shipping industry. Clarksons Research is part of the Clarksons Group, the world's largest provider of shipbroking and integrated shipping services. For more information about the Clarksons Group, visit www.clarksons.com.

Timely. We focus on providing timely information, using our wide data gathering network and wide range of proprietary sources to ensure deliveries, orders, demolitions and fleet changes are as up to date as possible. Our alerts function allows you to channel intelligence directly and our customised views allow access to the information most important to you quickly.

Authoritative. Building on over 50 years of vessel register heritage, the World Fleet Register provides trustworthy intelligence from the most authoritative provider of intelligence for global shipping.

User friendly. At Clarksons Research, we constantly use our own products to understand and analyse both the “big picture” and the “drill-down detail” across the shipping industry. Our market leading reports allow you to understand key trends in the shipping industry at an aggregate level. Our time-series and graphing module provides perspective on the key developments, while owner and builder profiles, and newly introduced interactive dashboards provide additional insight and visualization of the data. All the information is regularly updated and readily downloadable into Excel spreadsheet format.
